

Dimensions: States Of Being

There are Twelve Dimensions in our Universe plus THE ONE that connects to all other Universes known as the Cosmic Wound. Dimensions are just different States of Being interconnected thru the Holographic Light Grid, pulsating, waving wondrous movements of sound, color and form breathing in and out in the constant State of Creation.

The Fourth Dimension is a gray, polarized plane, housing the forces of Light and Darkness. Fourth dimensional consciousness is the awareness of the astral dimension in the astral body. The astral body is of a higher vibration than the physical body, it one higher octave in frequency. Perception of past, present, and future becomes more fluid here on the fourth. When we are asleep, we are unconscious in the third dimension, but we are conscious in the fourth dimension. Using our fourth dimensional astral bodies we have access to our imagination, psychic abilities, intuition, magic, and creativity. The fourth dimension still has the polarization of light and dark, so it is possible to experience negative energies on this level. This is also the place of ghosts, many lower frequency Extra-Terrestrial beings, angels and demons. The Kingdom of Faerie exists upon the middle level of the fourth dimension. Upon the fourth dimension, thought and feelings create reality almost instantly; fear can create a negative experience on the fourth dimension. Your fourth dimensional body has the ability to feel other energies. We travel through the fourth dimension by the fuel of our desires, thoughts, and emotions. If our emotions are fearful we will have a bad time in the fourth dimension.

The Fifth Dimension

Fifth dimensional consciousness is the awareness of Soul and spirit. This is the dimension of Unity Consciousness, still with an experience of "I" consciousness. There is no time or space on this level there is no illusion of separation. On this level you can meet angels, and stellar beings who are in a Light body. A light body is silicone based rather than carbon based like that of the physical body. There is no fear on this level we are held in truth and love of the Universal Creator. It is a dimension of Unconditional Love. Many when they connect on this level experience their selves as their higher selves or spiritual guides. There is no judgment, no polarity, sense of separation or limitation on the fifth dimension.

The Sixth Dimension

The sixth dimension is the realm of geometry and is the language of life and light, from which all things manifest. Sacred geometry is the study of form and structure. Sixth dimensional consciousness is the place of the morphogenic field. The morphogenic field is a field of information that holds memory and pattern in form. It is the dimension that you go to, to time travel and jump between parallel lives. The sixth dimension is a beautiful and intricate pattern of the universe. It is like a magic carpet that can take you to other places in the universe. Many Extra-terrestrial beings use this field of many portals to insert their consciousness into other realms and dimensions. This is how beings impart their energy into the dimensions of earth reality.

The Seventh Dimension

As we enter the higher dimensions beyond the sixth, we lose shape and form. The dimensions become more abstract and less easily described in human language. The seventh dimension is the realm of cosmic sound – not the vibratory patterns that we hear in the physical dimension, but the harmonics of creation. Seventh dimensional consciousness is the place of the group consciousness the “We”. When you are experiencing any synergy between people it is the activation of the soul group that makes this possible. Many beings of light group together on this level to interact with the levels below. Many Extra-terrestrial beings are not singular in consciousness like humans but are a group or we consciousness. The Zeta are beings who have no concept of separation or individuality. Many angelic beings such as the higher principles group together on this level as one being in their interaction and communication with the lower levels. This is the dimension you go to, to communicate with your soul family. You can travel back to your original home planet through the energy of the soul group.

The Eighth Dimension

The eighth dimension is the realm of the Divine Mind, or at least the aspect of the Divine Mind that manifests our galaxy. Some describe this as the divine light, but it's not simply light; it is the consciousness of creation. Eighth dimensional consciousness is the place of eternity. This is when the soul has expanded beyond anything tangible and definable. It is part of the manifest universe; it is this universe. On this level you get the perception of eternity and the infinite nature of soul and its creation. The figure eight symbolizes this as the serpent eating its own tail. It is a complete cycle, never beginning, never ending. You can access many universal beings on this level and the mighty arch angels. Giant cosmic serpents travel through this dimension holding the universe it is never ending cycles, it's never ending story. This is the place which fuels the kundalini energy that is curled up at the base of the spine. Once this energy is activated it ascends the soul up to the eighth dimensional level.

The Ninth Dimension

The ninth dimension is the galactic center, metaphysically described as a black hole that acts as the gravitational linchpin of our system. From a multidimensional view, the heart of the milky way is a gateway, an interface and transformational point, into the next realm, which some describe as a new universe. Ninth dimensional consciousness is the death portal, not that of the physical body but of the soul. The soul passes through this portal on its way into the manifest dimensions of light. All lower dimensions are variations of manifest dense-ifying light. Once through the portal the soul manifest

in its first individualized form, it is birthed. Though it is of a very high vibration, it is physically manifest. Once the soul passes through the portal on its return to the source, it ceases to be manifest but merges back into the pure energy of the universe. From the Universal Creator, Great Central Sun, we project ourselves through all these dimensions, this idea is then received by the Crystal-Core of Mother Earth and now the Holographic Projection of our multidimensional being can start. When we've access to this consciousness we can adjust our reality to the higher idea of who We Are.

The Tenth Dimension

The tenth dimension is the vertical axis that aligns the previous nine dimensions. It is the shaman's world tree, the Qabalistic Tree of Life, and the spire running through the dimensions. When a person's consciousness is simultaneously aware in all nine dimensions equally, it is in the tenth dimension. We use the tenth-dimensional axis all the time, to ascend and descend the vertical axis of reality, but the mastery of the entire axis gives us access to the tenth dimensional-consciousness. Tenth dimensional consciousness is the place of planetary /sphere consciousness. This is where you can become aware of all the planets that make up you as a consciousness. There is a planet in the universe which is you on this high level. The universe is made up of sound, ripples of tones, they merge as one to create spheres of energy and sound. On this tenth dimensional level it is possible to communicate with creation itself through sound and vibration of pure energy.

The Eleventh Dimension

Eleventh dimensional consciousness is the connection with the great central sun, the Universal Creator, on this level you are a ray of light that is being projected from the source to animate the dimensions below. The Elohim and Twin flames are on these levels. Angels are the holders of all the dimensions and are present on every level. The Elohim are the higher selves of these angelic beings. The eleventh dimension is the all-encompassing energy field that manifests and contains all previous dimensions, one through ten. This is the first realm of universal consciousness. Prime Creator manifests the "material" to create Universes. We call this material the Eleventh Dimension as 1 plus 1 are combined, creating two distinct energies in fusion. They are exactly equal yet different, a partnership of the Sacred Geometry of 2 Star systems. We can view a Dimension as an entity, attributing being-like qualities to them to help us have some concept of how they function. One of these entities is pure yin in nature-the Great Yin and the other is pure yang-the Great Yang. The Great Yin exists everywhere and always-as does the Great Yang.

The Twelfth Dimension

The twelfth dimension is the Great Central Sun of our universe, the source from which all the galaxies in our universe emanate and around which they all revolve. It is the source of universal consciousness, and a higher aspect of the Divine Mind and Creator. It is the Universal Logos, the universal creative source. It is not possible to envision the Twelfth Dimension. Numerologically, the number twelve is 1 and 2 joined. It represents the fusion of Unity and Duality. In Spiritual terms it is the All That Is with the focus to individualize. In the Galactic worlds it is the merging of all existing realities.

The Thirteenth Dimension

The thirteenth dimension is the Source, the Universal Creator – God. Once ascension is complete, we are one with Source again. It is the gateway to the universes beyond our own universe. This is the level of cosmic consciousness, the cosmic logos, and the source of all the other universes in the multiverse. It is through the thirteenth dimension that we are able to access other universes. Many see the thirteenth dimension as a new universe that humanity is ascending to, as mastery of the thirteenth dimension allows you to travel between universes. It is the Cosmic Womb as the Spirit Mind begins its descent through the 12 Planes of Density with the intent of becoming “individualized” as its experiential assignment.
